The LDD series are the industrial standard for OEM laser diode drivers and are ideal for high power applications where economy is important and performance cannot be compromised. Compact size is possible due to the low-loss Zero Voltage Switching inverter and incorporation of planar magnetics. The LDD is virtually wire free.

Power factor is greater than 0.99 (1Ø models) and conducted emissions meet stringent European regulations. No additional line filters required to meet EN 55011 emission requirements.

The LDD series is designed with multiple safe guards to protect your expensive laser diodes. Rise and fall times are strictly controlled to reduce high voltage transients which could damage the laser diode.

**ADVANTAGES**

- Ideal for OEM applications
- Safe turn-on/turn-off
- Compact design
- Power factor correction (1Ø models)
- Auxiliary +15V/-15V/+5V
- Low conducted emissions, low leakage
- ROHS Compliant

**Configurations:**

- Output current to 300A
- Maximum output voltage to 200V
- Analog or RS232 interface
- Universal input for all world voltages
- CE and safety agency approved
- Available handheld controller

XX = maximum required output current, YY = maximum required compliance voltage

### Specifications

#### INPUT
- **Voltage:** See table above
- **Power Factor:** >.98 (LDD-6000:~t80%)

#### INTERFACE
- **Connector:** 15 Pin “D” Sub Female
- **Current Program:** 0-10V for 0-Max Current
- **Current Monitor:** 0-10V for 0-Max Current
- **Voltage Monitor:** 0-10V for 0-Max Voltage
- **(Optional RS232 interface available)**

#### PERFORMANCE
- **Rise/Fall Time:** >10msec standard (faster rise times available)
- **Current Regulation:** <0.5% of Maximum output current
- **Current Ripple:** <0.5% of maximum output current
- **Current Overshoot:** <1% of maximum output current
- **Power Limit:** Limited to maximum power with power fold-back circuit

#### ENVIRONMENT
- **Operating Temp:** 0 to 40°C
- **Storage:** -20 to 85°C
- **Humidity:** 0 to 90% non-condensing
- **Cooling:** Forced air

#### REGULATORY
- LDD-100, LDD-150: EN60601
- LDD-150/250/400: EMC 60950, EN55022
- LDD-600/1000/1500: EN60601
- LDD-3000: EN60950, EN55022
- LDD-6000: EMC EN 61326

#### AUXILIARY OUTPUTS
- +5V @ 100mA
- +15V @ 200mA
- -15V @ 100mA

**Note:** Performance cannot be guaranteed below 25% of rated output current.

<td></td>
<td>Auxiliary 200mA</td>
</tr>
</tbody>
</table>

1. Always disable power supply (pin 1 low) prior to applying the mains voltage.

2. Pin 5 If maximum compliance voltage is less than 10V, Vout Monitor will read output voltage directly. If maximum compliance voltage is greater than 10V, then Vout Monitor will be scaled such that 0-10V = 0-Voutmax.

3. Applying a program voltage greater than 10.5 volts to Pin 7 (I-program) will latch power supply. Output current will not exceed 105% of rating.
